

See more strikes!

Try it today!

Strike Seeker is a fun NEW way to improve your scores!

A Strike Seeker lane has cameras that record you and track the ball automatically for every shot. Just walk up and bowl normally as Strike Seeker shows you replays of your delivery, measurements of the ball travel, and analyzes consistency of your most recent throws.

1

Video replay loop of your delivery.

See your entire approach and delivery from start to finish.

2

Video replay loop of your ball paths.

See the ball action on the lane. The black line is the current shot. Paths are color coded according to speed and older shots fade away. Every 2 MPH is a different primary color shade. Consistency scores that analyze the most recent shots appear after the first few throws.

3

Slow-motion video replays of the pin action.

Watch the pins fly at 1/4 normal speed!

4

Slow-motion video replays of the moment of ball release.

Watch the critical moment as you release the ball at 1/4 normal speed.

5

Data readings.

See the board number at the break point (**black**), board number at the arrows (**blue**), average ball speed (**color** coded), and ball launch angle (**green**). After first replay, recent shot data is shown in a table.
